

**David Jackson**  
**11 Stonehill Drive, Bromyard,**  
**Herefordshire, HR7 4XB, UK**

**SUMMARY PROFILE**

An experienced Crop Protection technical manager with particular expertise in plant pathology and seed treatment technology. A strong track record of global project management and leadership of effective R&D teams, coupled with a strong appreciation of commercial objectives and budgeting. An experienced and credible communicator and presenter, and a published technical author.

**CAREER SUMMARY**

**CHEMTURA CORPORATION**

1973-2008

Crop Protection Division of this global speciality chemical company, formerly known as Uniroyal Chemical.

**Global Project Manager, Seed Treatments**

1998-2008

International technical manager based in the UK (Langley and Evesham), responsible for development of new seed treatments and supply of technical support for existing products.

- Coordinated all technical aspects of the global seed treatment business
- Led teams comprising Development Biologists, Formulation Chemists and Regulatory Specialists to manage key projects
- Approved projects and the associated budgets for seed treatment development in North America, Latin America, Europe and Asia-Pacific regions
- Managed the technical evaluation of new candidate products from in-house and third-party origins
- Developed a series of new products based on the active ingredient ipconazole and led teams generating data for registration, which has now been achieved in several countries in North America, Latin America and Europe
- Supplied expertise globally to support and expand sales of existing fungicide and insecticide seed treatment products
- Represented Chemtura on the expert seed treatment working groups within the International Seed Federation (ISF) and European Seed Association (ESA) to promote benefits of seed treatments

**Product Development Manager, Seed Treatment Products, Europe/Africa/  
Middle East (EAME)**

1989-1998

- Responsible for seed treatment product development and technical support in EAME
- Managed a staff of up to 15 technical managers based across the Region
- Provided the technical expertise on the team responsible for Third Party liaison and the search for new seed treatment products

**Product Development Manager E/A/ME**

1986-1989

- Led the team of PDMs and Technical Managers responsible for all product development and TSS projects in the Region

- Personally responsible for development and support of seed treatment products in the region
- Led the development and support of carboxin-based, formulated products across the region

**Technical Manager, Europe North** 1984-1986

- Led all technical teams in new region comprising West and East Europe
- Responsible for all Uniroyal Chemical product groups
- Managed the relevant biological, formulation and regulatory resource groups based in Europe
- Maintained and expanded registrations of seed treatment, acaricide and PGR products to achieve significant sales increases

**Product Manager TSS Group** 1979-1984

- Planned and coordinated field development of all Uniroyal Chemical products in EAME Region
- Project team member together with Formulation and Registration colleagues

**Trials Manager** 1973-1979

- Developed tertiary screening and field evaluation methods for testing new leads from in-house sources
- Evaluated fungicides, herbicides and PGRs, with major emphasis on new seed treatment active ingredients and mixtures

**MURPHY CHEMICAL COMPANY** 1968-1973

- Screening Manager: Fungicides 1968-1970
- Field Trials Officer: Fungicides & Seed Treatments 1970-1973

**PROFESSIONAL MEMBERSHIPS**

Member of the British Mycological Society

**PROFESSIONAL TRAINING & QUALIFICATIONS**

Project Management training courses

Effective Negotiating course

Business Ethics

Software training

French: business fluent

**ACADEMIC QUALIFICATIONS**

BTech (Hons) in Applied Biology, with Plant Pathology major, University of Bradford, 1968

GCE 'A' Levels in Biology, Chemistry & Physics

**INTERESTS**

Hiking, gardening, bird watching & philately
